

Population Health Management -

KAHCF in partnership with AHCA is offering the following on population health management:

Register today for the complimentary webinars offered before the in-person educational offering at the Annual Meeting. Click on the KAHCF website -

- **Managing Managed Care: Evaluating the Financial Implications of the Transition from Fee for Service to Level Based Reimbursement-**
Webinar 1-Thursdays, October 20th 2:00pm -3:00pm (est)
While many Medicare Advantage Plans initially embraced the Patient Driven Payment Model (PDPM) there is an emerging trend toward replacing PDPM with a proprietary Levels based reimbursement methodology. Understanding the crosswalk between FFS rates and Levels will be critical in evaluating reimbursement adequacy and how to manage the risk with these contracts. AHCA/NCAL has created a new tool to assist providers in understanding the financial implications of this move to Levels based reimbursement. Join this webinar as we walk through the context for and how to use this new tool.
- **Managing Managed Care: Uncovering the True Return on Investment of Medicare Advantage Contracts**
Webinar 2-November 3rd 2:00pm -3:00pm (est)
With increasing administrative burden and changing reimbursement methodologies the true return on investment of Medicare Advantage contracts can be difficult to discern. AHCA/NCAL has developed a new tool to support providers in identifying the true return on investment of their contracts. Join this webinar as we walk through the Contract Assessment Return on Investment (CARI) tool and uncover the value of your contracts.

KAHCF Annual Meeting educational offerings -Tuesday, November 15th
1:00pm-2:30pm (est)

Provider Owned Networks: Improving Outcomes and Positioning for Success

With the increase in market penetration of Medicare Advantage and Medicaid Managed Care even the savviest providers are being challenged. Provider owned networks are helping providers improve clinical outcomes and access value based reimbursement. Attend this session to learn more about participation in Provider Owned Networks.
